📄 04 Feb, 2007 8:11 am **SillyDog701 server was attacked by Tidus/KJC**   [adt=82181]

We regret to report that not long after Tidus made this post•, SillyDog701 Message Centre was under a very high server request (a.k.a. leeching) from the very same IP address Tidus has been using recently. For all recent Tidus' recent attitude and other evidences, we are pretty certain it was Tidus attacking SillyDog701 server.

We are lucky that there were no damages found as of this attack.

That's nothing compared to what i'm capable of. If all this nonsense towards me doesn't stop, i might just start getting worse, and worse, and worse, till there's nothing left.

If that tiny little site ripping excercise has damaged your server (i was after a few of your wicked icons), what i have coming will kill it!

Unless your Moderators stop this harassment/ridiculing, i will make you regret it, and then i'll report you, for taking images of my blogs and stuff. Some of that material is my own, which falls under intellectual copyright. So it better stop now.

And i don't need to be a member to kill your site either, i have IP masking tools, and DDoS tools, so think on. It stops now, or else your little Linux server will.

Thank you for admitting.

You have posted a threat. You also nominated yourself as potential SillyDog701 server attacker.

Shall SillyDog701 server being offline for no reason, I believe SillyDog701 members will assist SillyDog701 on reporting you.

Sorry to burst your bubble, but there's no Linux server to stop here. 😊

UserAgent: Mozilla/5.0 (Windows; U; Windows NT 5.2 x64; en-US; rv:1.8.1.1) Gecko/20061030 BonEcho/2.0 (mmoy CE KRN-X02)
Computer Specs (to prove that everybody else is rich!): Turion 64 x2 TL-60 @ FSB 667, HP 3080, 1GB DDR2, Radeon Xpress 1150 (400MHz), 15" HP laptop display panel

Well, there's an easy way out of this Ant, i'm sick of grovelling to you:

Tell Mandrake to stop all this nonsense, and close the KJC thread, otherwise, i'll either:

1. Trash your server (it doesn't need to be a Linux server, i'm an expert with Windows servers, i'm a certified administrator. And even if it was Linux/Unix, Kassie will do it for me, she's a Unix server admin, she knows how to trash them. I don't, but she does! And she's 27, and highly qualified!)

2. Report you to your ISP, like i did Metropol. They still haven't learnt their lesson, they're all bickering again, and YOU started them off, so there's my evidence against you for that.)

And i have your home address and telephone number, so i'll phone your Mummy, and tell her not to give you any supper, and to smack your bottom.

Don't push me, Ant, i'm getting rather tired of all this. You want me to stop using profanity, and being nasty. Well, don't give me a reason to swear! You all want me to change, how the heck am i supposed to do this if you're all snitching, and won't drop it.

Make your choice. Either stop Mandrake, or choose coincidences 1 or 2. Easy. Then once it's all stopped, i can get the hell outta here, and start my life again, properly, no lies. You've all rubbed my nose in it, and i see the error of my ways.

hahaha, that's the funniest thing i've ever read. so, despite your theft of material from other websites, your consistent breaches of the business names act 1985 and now, an admission which is a crime under the computer misuse act, it is clear for anybody reading that nobody has committed any crime here but you.

perhaps you and your friend greg mitchell should use this debacle as as a lesson about living with the consequences of your actions rather than trying to brush them under the carpet as your minuscule intellects are clearly unable to deal with them.

No one uses your material **and** claimed to be his or her own, unlike a certain individual who used this youth photo• (claimed it was his company's truck) and took reports• modified a few words and claimed it was his or his company's.

All usage is under fair use.

If i've committed as many "crimes" as you say i have, and have been "reported" as many times as YOU said you were GOING TO (but never did, because you're a moron!) report me, then why am i still happy as Larry, going about my everyday activities, laughing at bullies like you?

If you've reported me as many times as you say you have, then why am i still here, living with my wife, starting a REAL PC company, with Greg, instead of in a jail cell, eh?

You may all have pictures and stuff, but there's no real evidence of me committing fraud, or even 'ripping SillyDog users off', as your first post here claimed i was doing, is there? Where's Companies House's or Trading Standards complaint confirmation letters? I'm not scared! As far as the law will be concerned, the server it all came from doesn't exist, and i can back that up. Because all the linked "articles" to my blog and stuff, aren't up anymore, so you're going to get done for wasting police time! 😡

Answer me that! As on Metropol, last time, i'm going to come out the winner in the end, i always do.

Maybe Dr Lobster knows what sort of penalties Tidus could face, in the UK, for the following offenses?

🔴 Death treats against Dr Lobster*

🔴 Threatening DDos attacks against Antony's server

🔴 Setting up a false company to clearly mislead and possibly even scam people

The members of the Metropol 24/7 forum and, in particular, Dr Lobster* should be commended for exposing Tidus' false company and schemes.
